Software Engineer With over 3 years in full-stack development and product cycle management, I've contributed to 5+ successful product launches in high-growth technologies.

Skills

- **Languages:** JavaScript, Typescript, Python, C, C#
- **Frameworks and Libraries:** React, Node.js, Express, Django, .Net
- **Databases:** MongoDB, MYSQL
- **APIs:** GraphQL, RESTful
- **Mobile Development:** Android Studio (Kotlin and Java)
- **Tools and Version Control:** GitHub, Docker, Jira, Adobe XD
- **Development Practices:** Agile Methodologies

Experience

Freelance Software Developer

Remote | 08/2023 – Present

- Collaborated with clients to develop customized web applications tailored to business needs.
- Leveraged React and Node.js to build efficient and responsive applications, ensuring smooth UI/UX experiences.
- Worked with MongoDB and GraphQL to create scalable and dynamic databases, optimizing performance for data-intensive projects.
- Managed the entire project lifecycle, including requirement gathering, planning, development, and deployment, using Agile methodologies.

Software Developer- Einfochips (An Arrow Company)

s Ahmedabad, India | 01/2021 – 07/2023

- Developed and maintained various features for Xfinity home automation products, resulting in a 25% improvement in response time and a 20% increase in system reliability.
- Implemented microservices architecture and optimized system components to enhance scalability and performance across 15+ global markets.
- Automated key development tasks and reporting processes using Python scripts, leading to a 15-hour weekly reduction in manual effort and improving operational efficiency.
- Worked closely with cross-functional teams to resolve critical system issues, ensuring the overall stability of the Xfinity product suite.
- Contributed to C and Python development for 4 critical modules, collaborating with engineering teams to troubleshoot and resolve product issues.

Projects

Hospital Management System

- Designed and developed a scalable full-stack application to manage hospital operations and streamline patient data management.
- Architected and implemented a secure and efficient API using Node.js and Express.js, enabling smooth data flow between the front-end and the back end.
- Integrated GraphQL to enhance performance in data querying and manipulation, optimizing communication between the server and client-side applications.
- Utilized React and Redux to build a dynamic and responsive user interface, ensuring seamless navigation across various hospital management sections like patient records and appointments.
- Leveraged MongoDB's flexible schema design to efficiently manage and scale large datasets.

Education

Web Development

• Full Stack • Node • React • TypeScript • Android Studio • DevOps • UI/UX

Ontario, Canada

Bachelor of Engineering (Computer Engineering)

• Data Structure and Algorithm • Database Management System • Object Oriented Programming • Operating Systems

Gujarat, India
